Subject: Meeting Request - Battery Technology
Attachments: image001.jpg

Shane,

I am hoping to schedule a meeting with officials at ARPA-E for our clients, Topspin Partners, Sion Power and G4 Synergistics, to discuss the advances and future direction of vehicle battery R&D. The meeting would be with Mr. Leo Guthart, CEO of Topspin Partners and Chairman of the Board for both Sion Power and G4 Synergetics, Dennis Mangino, CEO of Sion Power. We are also hoping to be able to schedule Dr. Siegfried Dais, Deputy Chairman for Management for Robert Bosch, and Dr. Andreas Kreimeyer, Board of Directors for BASF, who would be traveling from Germany, if available, as both companies are working with us on developing these technologies.

Sion is a Tucson, Arizona, company that has been working for some time on lithium sulfur battery technology and, under new management, has made significant strides in solving a number of the technological obstacles to developing batteries that have the potential of four times the energy density of the best batteries being used today. G4 is in Gainesville, Florida, and has made huge advances in research related to bipolar design, which has the potential to greatly improve performance of batteries regardless of the chemistry used. These companies are working with others in the industry (Bosch and BASF) and with experts at Argonne National Laboratory.

I am trying to get dates that might work on your end for officials at ARPA-E. I am also seeking meetings with officials at EERE and Science and we have discussed the 17th as a potential meeting date with EERE. Perhaps we could do this in one meeting but we are happy to have separate meetings if that is better at your end.

As we discussed, I am a registered lobbyist. I previously served as the Staff Director of the House Science Committee's Energy Subcommittee from 2002 to 2003. While I would like to attend the meeting, I am happy to not attend if that helps in scheduling the meeting.

Thank you for your help.

Gabe
